

# The complexity of your workers' compensation claims continues to grow. Your A/R doesn't need to grow too.

Workers' compensation claims typically account for only 3-5% of a hospital's revenue, but they require an inordinate amount of effort to compliantly bill and collect.

## We are here to help.

**Workers' compensation claims** are difficult and tedious to manage, ultimately requiring additional hospital resources in order to get these accounts paid properly.

**Argos Health alleviates these concerns** by securely managing the hospital's workers' compensation inventory from patient registration to cash posting, and resolve any complications along the way, allowing your team to stay focused on other priorities.

**Equipped with wide-ranging expertise** related to workers' compensation systems across the country and a proprietary software platform, we are able to offer a full-service solution to resolve each case in a timely and compliant manner, helping both hospitals and their patients.

### THE WORKERS COMPENSATION LANDSCAPE

#### STATE-TO-STATE VARIANCE

State-specific regulations and benefits associated with WC claims requiring jurisdictional expertise.

#### COMPLIANCE

There is an extensive array of compliance demands revolving around workers' compensation claims.

#### STATUTE OF LIMITATIONS

Claim and bill submissions each have unique requirements and timelines in order for successful payment.

#### DENIALS

Denial rates tend to be higher than for other payers due to the difficulty involved in coding & billing W/C claims.

#### PATIENT SATISFACTION

The complexity of these claims means they have potential to generate patient satisfaction issues.

#### REIMBURSEMENT RATES

Rates vary by state with fee schedules and references to Medicare reimbursement changing frequently.

*As the world of healthcare grows increasingly complex,  
your claims inventory doesn't have to.*
